Sehr geerte Damen und Herren Bratic,

as promised, after 3 months, you now have the 2nd SebaKMT newsletter. You can read about innovations and about well established items from our product range, news from our sectors, hints and tricks in the field of leak and line locating and company news.

We again hope that you enjoy reading and informing on our website.

With best regards from Baunach,

Carolin Badziura
Marketing and Communications

20 years of VLF Testing

More than 1500 customers worldwide are using the Cosine Rectangular technology for VLF testing.

This year, Seba KMT is celebrating the 20st anniversary of the 0.1 Hz VLF Cosine Rectangular VLF Technology, for which it received an International Patent in 1986. Over the past 20 years we have sold more than 1500 units worldwide.

▶ Hints and Tricks

Zone measurements with noise loggers – a sensible alternative

Efficient leak location starts with a zone measurement. However, this does mean installing flow measurement equipment at various points in the network. That is an expensive and time-consuming project. Noise loggers are a real alternative.
